

Nobleford BMX Track

History and Future

The original Kenex Park bicycle BMX track was part of the Kenex subdivision plan and finally built in 1985. The Village-appointed 2004 Environment Recreation and Parks Committee included a BMX track upgrade in their future plans and upgraded the Kenex site in 2004/05. The track was leveled in 2010.

Many people young at heart find enjoyment in riding a bicycle up and down hills, banked corners and flying through the air over jumps. Many also like to do the same with motorcycles, ATVs, quads, etc. There is a group of people that are interested in organizing to form a Nobleford society that would pursue the development of a park that could accommodate all kinds of thrilling activity.
